

Air One is a radio station that I listen to all the time. There is no other stations that provides this uplifting music and community services. It is an asset to its listeners. In a sea of radio stations that provide negative language and talk to youth and adults, Air One provides only positive service to help people. I am concerned that LPFM will displace this station. Please don't allow this. LPFM is not good for our community, Air One is good for our community. It is fully listener supported, if it was not providing an indespesable service to the community then it would not be in business. Imagine if LPFM was suported on T.V. . I would hate to loose PBS or another station providing quality programming in favor of a closer station that is not under the LPFM umbrella.
